Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Change of Examiner

1. Note the change of Examiner in the present application. The Art Unit number (1624) remains the same.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Response to Amendment

3. The amendment of February 12, 2004 canceled claims 1, 2, 4, 5, 7 and 8. Accordingly, the claims now pending are claims 3, 6 and 9. It is noted that the dependency of claim 9 is on a now canceled claim. Correction is requested.
4. In view of applicants' amendments and arguments, the Section 112 rejections of record have been overcome. The following new ground of rejection is, however, seen necessary to complete the record.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 3, 6 and 9 are newly rejected under 35 U.S.C. 103(a) as being unpatentable over Abood et al., of record, and cited as an "X,P" reference in applicants' corresponding PCT application. This patent also corresponds to WO 96/37485 cited in the present specification. The generic formulas in Abood et al. and the present application are essentially the same. While the present pending compound claim is limited to 18 specific species thereunder, no patentable significance is seen in these compounds. One would be motivated to prepare the present specific compounds from under the genus of the reference which, in fact, is essentially the same as the genus in the present specification, with the reasonable expectation of obtaining additional useful anti-viral agents, the use of the present compounds also. In the absence of a showing of unexpected properties for the present selection, no patentable significance is seen therein.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Conclusion

8. This action is **not** made final in view of the new ground of rejection.
